59% increase from 2010

The recruitment strategy we used last year for BAA applicants got a larger percentage of applicants in the pool, however we found that across the year none of the applicants we contacted turned out to be applicants with valid info. There were multiple cases of wrong contact information on the applications, wrong birthdate/grade level, little to no awareness of the school. That is why we shifted strategies. While the percentage is a bit lower, it went from 5% to 8% from beginning of Jan. to end of Feb. based on our parents' efforts at Cedars and at Oasis. I think that with time, this approach will grow successfully for us.

One additional 5th grade application has come in since the lottery so there is only 1 remaining space at this time. We will be monitoring it closely and continueing to recruit a waiting list for those offers not accepted.
